

RASHMI JAYAWARDHANA

+94 70 366 0133 | Panadura, Sri Lanka | rashmijayawardhana2001@gmail.com

[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Full-stack software engineer skilled in ReactJS, Angular, React Native, Spring Boot, and Node.js, with a year of professional experience building production web and mobile applications. I have delivered scalable systems using microservices architecture and real-time features, and I am comfortable working across cloud and DevOps workflows with a strong focus on writing clean, well-tested code. I enjoy collaborating in teams and take pride in turning requirements into reliable products. Currently looking for a Full Stack Software Engineer role.

CORE COMPETENCIES

- **Languages:** Java | C++ | C | Python | TypeScript | JavaScript
- **Frontend (Web):** ReactJS | Angular | Next.js | Angular Material | Tailwind CSS | HTML | CSS
- **Frontend (Mobile):** Flutter | React Native | Expo
- **Backend:** Spring Boot | Node.js | Django
- **Databases:** PostgreSQL | MySQL | MS SQL | MongoDB
- **Cloud & DevOps:** Docker | AWS | Firebase | GitHub Actions
- **Tools & Testing:** Figma | Cypress | Cucumber BDD | Git

PROFESSIONAL EXPERIENCE

Creavint | Full Stack Software Engineer Intern

April 2025 - April 2026

- Contributed to a full-stack Logistics Management platform built with React, React Native, Expo, Spring Boot, PostgreSQL, TypeScript, and Tailwind CSS. (Team)
- Developed a Food Delivery application using React, React Native, Expo, Spring Boot, PostgreSQL, and TypeScript, with a microservices architecture dockerized on an Ubuntu VPS. (Team)
- Built a Blog application with Next.js and Backblaze B2 for MDX content management and cloud image storage, and developed a Vehicle Rental mobile app frontend in React Native and Expo. (Individual)
- Developed custom Perfex CRM modules in PHP, MySQL, jQuery/AJAX, and Bootstrap, including CRUD operations, role-based access control, transactional HTML emails, file uploads, public customer portals, and self-healing database migrations. (Individual)

EDUCATION & CERTIFICATIONS

University of Moratuwa | B.Sc. (Hons) in Information Technology

2022 - 2026

Faculty of Information Technology, Moratuwa, Sri Lanka

WSO2 | Linux Systems Administration and DevOps Engineering Training Program

2025

Covered Linux administration, networking, Docker, Cloud Deployment(AWS), Terraform, Ansible, GitHub Actions, ArgoCD, and OpenSearch. Final project: a microservices e-commerce platform with an AI-powered PC Builder, deployed with a full CI/CD pipeline.

Panadura Balika Maha Vidyalaya | GCE Advanced Level 2020, Physical Science Stream. Z-Score: 1.85 (Combined Maths A, Chemistry A, Physics B)

Panadura Balika Maha Vidyalaya | GCE Ordinary Level 2017, 9 A Passes

RESEARCH

Automated Lecture Video Summarization with Condensed Video Output (Group - Completed) | [GitHub](#)

- Co-developed a four-module deep learning pipeline condensing 60-minute IT lectures into narrated summary videos, deployed with FastAPI backend, Supabase database, and Vite frontend; verified via live inference on real lectures.
- Owned the Keyframe Detection module (frozen ResNet-50 + BiLSTM); built a 61-video, 23,402-segment annotated dataset via a custom two-step protocol; achieved F1 = 0.87 (precision up to 0.96).
- Worked with PyTorch, Whisper, BERT, ViT, EasyOCR, MoviePy, FFmpeg; system-wide results include BERT F1 = 0.83 and 74.9% slide-classification accuracy.

Cost-Performance Trade-offs in Cloud-Based LLM Inference (Individual - In Progress) | Review Paper

- Reviewing AI and ML optimization techniques for cloud-based LLM serving across scheduling, deployment architecture, interruptible cloud capacity, sparse models, and prompt reuse, synthesizing OSDI, ASPLOS, MLSys and NeurIPS work into one cost-versus-latency view.

SELECTED PROJECTS

Microservices Platform on Managed Kubernetes (Group - 2026) | [GitHub](#)

- Designed and Deployed a five-service e-commerce platform (Flask, Express, React) on AWS EKS Fargate with Terraform IaC, GitHub Actions CI/CD, CloudWatch observability, and security controls.
- Owned Cost Management (Terraform cost-allocation tags, AWS Budget alerts, ~50% reduction) and Disaster Recovery (RTO/RPO targets, RDS/DynamoDB PITR backups, DR runbook). Authored three Architecture Decision Records.

Project Management System for Large-Scale Construction Companies (Group - 2024) | [GitHub](#) | Mentored by LSEG

- Built a web and mobile platform supporting five user roles, covering project, task, and inventory management with real-time low-stock and email notifications, using React, Tailwind CSS, Flutter, Spring Boot, MySQL, Socket.IO, and SMTP. Owned the administrator and client modules and JWT authentication and authorization.

Real-Time Task & Messaging App (Individual - 2025) | [GitHub](#)

- Built a full-stack real-time messaging app on a hybrid REST and WebSocket architecture, with push notifications, optimistic UI updates, offline queue handling, and automatic socket reconnection, using React Native (Expo), TypeScript, Redux Toolkit, Node.js, Express.js, Socket.IO, and MySQL. Deployed the backend on AWS EC2, covered by Jest tests, and delivered within a four-day timeline.

YouTube Upload Success Predictor for Sri Lankan Creators (Individual - 2025) | [Live Demo](#)

- Built an XGBoost classifier (71.4% accuracy, 0.814 AUC-ROC) on 20 pre-upload features from 275 videos across three channels, applying channel-relative labelling to remove scale bias and prevent data leakage, with SHAP-based explanations served through a deployed Streamlit app.

QA Test Automation Suite (Group - 2025) | [GitHub](#)

- Designed UI and API test cases from SRS documents, automated test scenarios, generated Allure reports, and configured CI builds using Cypress, Cucumber (BDD), Swagger, Allure, and Jenkins.

Flight Tracking & Travel Management App (Individual - 2024) | [GitHub](#)

- Built a full-stack mobile app for real-time flight tracking with the AviationStack API, secure authentication, and a responsive Android and iOS interface using React Native (Expo), PostgreSQL (Neon serverless), Zustand, Google OAuth via Clerk, and Tailwind CSS.

Task Manager Application (Individual - 2025) | [GitHub](#)

- Built a task-tracking web app with CRUD operations, status filtering, threaded comments, JWT authentication, and role-based access (Admin/Employee), containerized with Docker Compose, using Angular, Angular Material, Spring Boot, Spring Security, and MySQL.

Additional projects are on [GitHub](#).

VOLUNTEERING EXPERIENCE

Coordinator, Ganitha Saviya, Kalutara District | Sasnaka Sansada | 2021 – 2022

Volunteer Mathematics Teacher, Government Schools | Sasnaka Sansada | 2021 – 2023. Helped strengthen STEM education in Sri Lanka by teaching mathematics to government-school students.

ADDITIONAL INFORMATION

- **Soft Skills:** Leadership, teamwork and collaboration, time management, and problem solving.
- **Languages:** English and Sinhala.
- **Content Creation:** Run a personal YouTube channel (Rasmi Vibes) since May 2025, producing travel, vlog, and hotel review content, which has built practical skills in video production and editing.
